

# Blueprint for Houston's Future

Mark  
Bianco

1 Houston is a big city with a large population. There are some ways we should change Houston to help our communities and schools to be better and safer. In 2036 I will be 25 and I hope that things will be different for the better. I would like to see bullying stop, to ban vapes and drugs, and decreasing the amount of murder.

2 First, I would like to see bullying stop because it's not nice and is disrespectful. It has caused a lot of mad parents and hurt feelings. One way we can prevent bullying is to make the bully and the person being bullied hang out for an entire day. So if we start doing that, every one can be themselves without worrying.

3 Next, I think we should change the law about vapes and drugs because vapes and drugs are causing teens to do bad things. It has affected our city by kids and teens lying to their parents and getting them in trouble. One way we can stop doing drugs and using vapes is by banning it completely. It would help us and parents being able to trust others.
