2036

the world

I think ^{the world} will look very different in the year 2036. I think we might have flying cars and maybe even dinosaurs like before! I will be 25 in 2036. I hope in 2036 I will be a successful and have a nice house.

and i think covid will be cured by 2036, hopefully....

I think that most people who are homeless now will have homes! I hope God will bless them. Maybe we will have a new animal... maybe called the Catti-fly, a cattipier that flies.

I know that the people here believe in a different God but maybe before or after 2036 Jesus will come back?! Maybe we will have less or more trees? Maybe there will be less trash and the world will be more clean? Maybe animals that exist now will be extinct?! Or maybe some of us won't be here, or maybe the world won't change at all? I hope that our internet will be better. In the future I hope that the world will be cleaner because our world right now is very dirty, things you can do to help is recycle and if you see trash, pick it up!! even if it's not yours! (you don't have to but it will help) if you see someone littering tell them to stop! all the plastic that gets thrown in ocean, kills animals! So if we don't do our part (to keep the world clean) the world will have a big change.
